

RMA40A

Light track adapter mount for ATEO4

Highlights:

- Adds an 30° angle
- Included WMA40 adapter
- Compatible with major brand lighting tracks

Product information:

The RMA40A is an adapter for assembling ATEO4 loudspeakers* on light rails which are commonly used in installations such as retail environments. It comes with an included WMA adapter, offering optimal possibilities for inclination in any direction. A mechanical connection is provided, without having any electrical connection between the loudspeaker and the light rail. It is compatible with 3-phase lighting tracks from most major brands including Global trac and Eutrac.

*ATEO4 loudspeaker not included with RMA40A.

Variants:

- RMA40A/B - Black version
- RMA40A/W - White version
