

Highlights:

- Compatible with 12-space CASY chassis
- Tension relief bar for fixation of cabling
- 1.5 mm thick cold rolled steel frame
- Structured and scratch resistant black powder coating
- Assembly screws included

The CASY021 is a strain relief which can be fitted to any 12-space main chassis from the CASY series. It features a tension relief allowing cable fixation over the entire width. This guarantees a clear cabling overview with reliable connections, even in mobile applications and situations where connections are regularly touched and re-plugged. The fixation of the CASY021 to any 12 space main chassis is done using the included M3 screws. The construction is made out of coldrolled steel and finished in a black (RAL9004) structured and scratch resistant powder coating.
